About Me

I am Revan Novendri, an Informatics Engineering student at Dinamika Bangsa University. I enjoy building modern, responsive web applications using technologies like React, Node.js, Express, and MongoDB. Eager to gain real-world experience and contribute to a dynamic development team. I am a fast learner, comfortable working both independently and collaboratively, and always ready to take on new challenges

Education

2021-2024 | State Senior High School 6, Jambi City | Science Department

During my time in high school, I was interested in the world of IT and I studied HTML, CSS and JavaScript.

2024 - Present | Dinamika Bangsa University | Informatics Engineering Study Program

During my time at university, I joined the Robotic organization or UKM at Dinamika Bangsa University. In college, I studied Arduino, ROS programming and made an obstacle avoiding robot.

Skills

- | | | |
|---------------|-------------------|---------------|
| • HTML | • Next Js | • Express JS |
| • CSS | • Problem Solving | • RESTful API |
| • Java Script | • Mongo DB | • Python |
| • React Js | • Node JS | • C# |

Certifications

Dicoding Belajar Dasar Pemograman Web

Learn the basic components of HTML and CSS which are the main foundation for becoming a front-end web developer.

Dicoding Belajar Dasar Pemograman Java Script

Learn the basics of JavaScript, from fundamentals, ES6 syntax and features, to test automation concepts using popular frameworks.

Dicoding Belajar Membuat Front-End Web untuk Pemula

Learn about DOM manipulation, events, and web storage to improve the functionality and interactivity of your website.

Dicoding Belajar Back-End Pemula dengan JavaScript

This class is intended for individuals who want to become Back-End Developers with AWS's international competency standards. Students will be able to independently create a simple RESTful API to support an application's functionality.
